AWS CERTIFIED AI PRACTITIONER · AIF-C01

Domain5　安全、合規與治理　精選練習 10 題

第 1 題

A company wants to create a chatbot by using a foundation model （FM） on Amazon Bedrock. The FM needs to access encrypted data that is stored in an Amazon S3 bucket. The data is encrypted with Amazon S3 managed keys （SSES3） ◦ The FM encounters a failure when attempting to access the S3 bucket data. Which solution will meet these requirements?

A. Ensure that the role that Amazon Bedrock assumes has permission to decrypt data with the correct encryption key.
B. Set the access permissions for the S3 buckets to allow public access to enable access over the internet.
C. Use prompt engineering techniques to tell the model to look for information in Amazon S3.
D. Ensure that the S3 data does not contain sensitive information.

第 2 題

A financial institution is using Amazon Bedrock to develop an Al application. The application is hosted in a VPC. To meet regulatory compliance standards, the VPC is not allowed access to any internet traffic. Which AWS service or feature will meet these requirements?

A. AWS PrivateLink
B. Amazon Macie
C. Amazon CloudFront
D. Internet gateway

第 3 題

A security company is using Amazon Bedrock to run foundation models （FMs） ◦ The company wants to ensure that only authorized users invoke the models. The company needs to identify any unauthorized access attempts to set appropriate AWS Identity and Access Management （IAM）policies and roles for future iterations of the FMs. Which AWS service should the company use to identify unauthorized users that are trying to access Amazon Bedrock?

A. AWS Audit Manager
B. AWS CloudTrail
C. Amazon Fraud Detector
D. AWS Trusted Advisor

第 4 題

A company wants to use a large language model （LLM） to develop a conversational agent. The company needs to prevent the LLM from being manipulated with common prompt engineering techniques to perform undesirable actions or expose sensitive information. Which action will reduce these risks?

A. Create a prompt template that teaches the LLM to detect attack patterns.
B. Increase the temperature parameter on invocation requests to the LLM.
C. Avoid using LLMs that are not listed in Amazon SageMaker.
D. Decrease the number of input tokens on invocations of the LLM.

第 5 題

A company is using the Generative Al Security Scoping Matrix to assess security responsibilities for its solutions. The company has identified four different solution scopes based on the matrix. Which solution scope gives the company the MOST ownership of security responsibilities?

A. Using a third-party enterprise application that has embedded generative Al features.
B. Building an application by using an existing third-party generative Al foundation model （FM）。
C. Refining an existing third-party generative Al foundation model （FM） by finetuning the model by using data specific to the business.
D. Building and training a generative AI model from scratch by using specific data that a customer owns.

第 6 題

A medical company deployed a disease detection model on Amazon Bedrock. To comply with privacy policies, the company wants to prevent the model from including personal patient information in its responses. The company also wants to receive notification when policy violations occur Which solution meets these requirements?

A. Use Amazon Macie to scan the model's output for sensitive data and set up alerts for potential violations.
B. Configure AWS CloudTrail to monitor the model's responses and create alerts for any detected personal information.
C. Use Guardrails for Amazon Bedrock to filter content. Set up Amazon CloudWatch alarms for notification of policy violations.
D. Implement Amazon SageMaker Model Monitor to detect data drift and receive alerts when model quality degrades.

第 7 題

Which prompting technique can protect against prompt injection attacks?

A. Adversarial prompting
B. Zero-shot prompting
C. Least-to-most prompting
D. Chain-of-thought prompting

第 8 題

A company needs to log all requests made to its Amazon Bedrock API. The company must retain the logs securely for 5 years at the lowest possible cost. Which combination of AWS service and storage class meets these requirements? （Choose two.）

A. AWS CloudTrail
B. Amazon CloudWatch
C. AWS Audit Manager
D. Amazon S3 Intelligent-Tiering
E. Amazon S3 Standard

第 9 題

Which option is a characteristic of Al governance frameworks for building trust and deploying human-centered AI technologies?

A. Expanding initiatives across business units to create long-term business value
B. Ensuring alignment with business standards, revenue goals, and stakeholder expectations

C. Overcoming challenges to drive business transformation and growth

D. Developing policies and guidelines for data, transparency, responsible Al, and compliance

第 10 題

A company needs to automate the discovery of sensitive data in an Amazon S3 bucket. Which solution will meet this requirement?

A. Configure S3 Object Lambda for the S3 bucket.

B. Configure server-side encryption with AWS KMS keys（SSE-KMS）for the S3 bucket.

C. Configure Amazon CloudWatch arms for the S3 bucket.

D. Configure Amazon Macie for the S3 bucket.
